

INTRODUCING SENSIBLE ONLINE ACCOUNT PROTECTION THAT WORKS 24/7

We're proud to announce the launch of our free new identity verification feature.

What is the new security feature?

This upgrade is a practical approach to making your online banking experience as secure as possible. The **new security feature** watches for uncharacteristic or unusual behavior involving your Internet banking access. If anything out of the ordinary is detected, we will ask you to **verify your identity**.

How does it work?

In the rare case we detect any **unusual or uncharacteristic activity**, we will ask you to either answer security questions or we will phone you to make sure that it's really you. Most of the time you won't notice that the security feature is even there... but it will still be protecting you 24/7.

Do I need to sign up for the new security system?

We are rolling out the new security system to all of our online banking customers. Expect to be prompted at some point while banking online to enter **additional information**. This may include choosing several security questions that only you know the answers to as well as supplying **phone numbers** where you can be reached while banking online. Once this occurs you have added a layer of protection to your internet banking access.

If you have any questions regarding this new security feature, visit our FAQ page at http://www.firstbankak.com/home/ab.ab_security
